

Oncologist

Post Surgery/Biopsy Questions

- What is the exact name of my cancer diagnosis?
- Where is the primary tumor located?
- Has the cancer spread away from the primary cancer - metastasis Yes/No ? What stage is this?
- What is the prognosis for this cancer?
- Do you have current experience with this diagnosis?
- Are you current with clinical trials for my diagnosis
- IHC biomarker test: **Important**
Has my biopsy been tested for PD-L1 & MSi status?
- Biomarkers - What other biomarkers are related to my diagnosis and immunotherapy trials.
- If IHC test is completed: Are there any biomarkers that align to any immunotherapy treatment options?
- If an IHC does not provide any targetable biomarkers, can we organise Genomic Profiling of the biopsy?
- Does my biopsy sample have enough tissue for multiple tests?
- Can you explain my first-line treatment options and then my second line options? Including side Effects

Primary location

Mark the exact location &
write the full name of this location

Metastasis

Secondary Locations
Mark the exact locations of where
the tumor has spread to
